Profile Summary

Motivated and reliable **IT Support and System Assistant** with hands-on experience in **system administration, fullstack development, cybersecurity, and technical support**. Skilled in maintaining both **hardware and software systems**, troubleshooting network and application issues, and providing user support across hybrid environments. Strong foundation in **PHP (Laravel), Python, Go, and JavaScript**, with experience in **Linux-based systems, database management (PostgreSQL, MySQL, SQLite)**, and **cloud technologies (Docker, Kubernetes)**. Known for a **pragmatic problem-solving approach, clear communication**, and a **security-first mindset**.

Committed to improving **system performance, ensuring data integrity**, and **delivering fast, reliable technical solutions** that enhance productivity and user experience. Passionate about combining **software engineering, cybersecurity awareness, and IT support** to maintain secure, efficient, and user-friendly systems.

Technical Skills

Programming & Scripting: PHP (Laravel), Python, Go, Node.js, JavaScript, Bash

Web & Databases: HTML, CSS/SCSS, SQL, PostgreSQL, MariaDB, SQLite3, JSON

Frameworks & Tools: Docker, Kubernetes, Django, ReactJS, Bootstrap

Version Control: Git, GitHub, GitLab

System Administration: Linux-based environments, Linux & Windows servers, installation, user account management, file systems, server monitoring, performance tuning, troubleshooting

Networking: TCP/IP, DNS, DHCP, LAN/WAN setup, network monitoring, troubleshooting

Hardware Support: Diagnostics, upgrades, preventive maintenance

Software Tools: Microsoft 365, VMware, VirtualBox, Docker

Security & Backup: Firewalls, access control, data recovery, antivirus systems

Soft Skills: Teamwork, communication, problem-solving, adaptability

Other Tools: Trello, Slack, Confluence, Figma, Canva

Work Experience

Software Developer

Apr 2024 - Present

Zone01 Kisumu | Kisumu County, Kenya

- Developed and deployed an **ERP system** that reduced manual workload by **85%** through process automation and expense tracking.
- Optimized and maintained backend APIs and databases, increasing application performance by **35%**.
- Built a **digital marketplace using Django (Python)**, improving system speed and security by **67%**.
- Handled **system administration** tasks such as server monitoring, performance checks, and database optimization.
- Collaborated closely with cross-functional teams to improve existing systems and support ongoing development.
- Assisted in managing **Linux-based servers**, ensuring uptime and smooth operations for all development environments.
- Handled **user support** by troubleshooting hardware/software issues and ensuring system availability across multiple departments.
- Supported **network setup and maintenance**, including IP configuration, system imaging, and backup management.
- Monitored performance logs and carried out **routine preventive maintenance** to reduce downtime.
- Collaborated with developers to deploy and maintain internal tools and web systems securely and efficiently.

IT Intern | Technical Support

IT Intern | Technical Support

Kisumu County Referral Hospital | Kisumu, Kisumu County, Kenya

Jan 2024 - Aug 2024

- Supported the installation and configuration of operating systems, office applications, and networking devices.
- Assisted in **user account creation**, password management, and device troubleshooting.
- Helped maintain computer labs and set up LAN connections for internal systems.
- Documented helpdesk issues and maintained inventory of IT equipment and software licenses.

Mentor

Young Scientists Kenya | Concern Worldwide Offices, Ariel House, Westlands Avenue, Nairobi, Kenya

Feb 2023 - Aug 2023

- Trained **100+ students** in basic programming and computational thinking using Scratch.
- Designed and led **50+ coding sessions**, improving student understanding and engagement by **70%**.
- Helped develop simple, hands-on coding projects that improved logical problem-solving and creativity.

Education

Maseno University

Diploma in Information Technology | 2022 – 2024

Key Courses: Network Design, Data Structures, Algorithms, Programming, Applied Mathematics, Computer Systems, Database Management, Information Security, System Analysis

GPA: Distinction

Eldoret National Polytechnic

Diploma in Biomedical Engineering | Sep 2017 – Nov 2020

Courses: Medical Electronics, Engineering Mathematics, Hospital Engineering

GPA: Credit

Key Strengths

- Strong foundation in **legacy PHP systems** and **modern Python development**
- Skilled in **Linux-based system administration** and **database optimization**
- **Creative and committed** problem solver with a practical mindset
- Reliable communicator in **remote and hybrid environments**
- Fast learner who adapts to **new technologies and complex systems**

Key Achievements

- Reduced downtime by 40% through proactive maintenance and automated system checks.
- Enhanced system security by implementing 2FA and firewall rules for user accounts and servers.
- Assisted in setting up a local development network for internal testing and team collaboration.
